

## Ealing Together Fund - Areas with relatively high levels of deprivation

This document contains extracts from Deprivation in Ealing, A report on the English Indices of Deprivation 2019. If a project is located, or providing for those, in an area which has relatively high levels of deprivation (see wards in shades of red, and deciles 1-5, the darker shades of red, in the map below) it will be given bonus scores depending on how strongly it aligns with the council's priorities. For campaigns being run in all other areas the projects will be assessed on their fit to the fund's criteria only.

**Table 2: The 3 Most and 3 Least Deprived Wards in Ealing (out of 23) based on Scores for: Overall Index of Multiple Deprivation, 7 Domains, IDACI and IDAOPI (2019)**

| Rank | Overall Index (IMD) | Income            | Employ'nt         | Education         | Health & disability | Crime             | Barriers to Services & Housing | Living Env't        | IDACI             | IDAOPi            |
|------|---------------------|-------------------|-------------------|-------------------|---------------------|-------------------|--------------------------------|---------------------|-------------------|-------------------|
| 1    | Northolt West End   | Northolt West End | Norwood Green     | Southall Green    | Norwood Green       | Northolt West End | Northolt West End              | Walpole             | Northolt West End | Northolt West End |
| 2    | Norwood Green       | Norwood Green     | Northolt West End | Southall Broadway | South Acton         | Southall Broadway | Southall Broadway              | East Acton          | Norwood Green     | Southall Green    |
| 3    | Southall Broadway   | Southall Green    | Southall Broadway | Northolt West End | Northolt West End   | Ealing Common     | Norwood Green                  | South Acton         | East Acton        | Southall Broadway |
| 3    | Walpole             | Southfield        | Southfield        | Southfield        | Southfield          | North Greenford   | Southfield                     | Northolt West End   | Southfield        | Southfield        |
| 2    | Southfield          | Hanger Hill       | Hanger Hill       | Walpole           | North Greenford     | Hanger Hill       | Walpole                        | Northolt Mandeville | Hanger Hill       | Hanger Hill       |
| 1    | Northfield          | Northfield        | Northfield        | Northfield        | Hanger Hill         | Perivale          | Northfield                     | Lady Margaret       | Northfield        | Northfield        |

### Uses of the Indices

The Indices of Deprivation can be used for the following purposes:

- Comparing small areas across England
- Identifying the most deprived small areas
- Exploring the domains (or types) of deprivation
- Comparing larger areas e.g. local authorities
- Looking at changes in relative deprivation between versions

However, there are a number of things that the Indices cannot be used for:

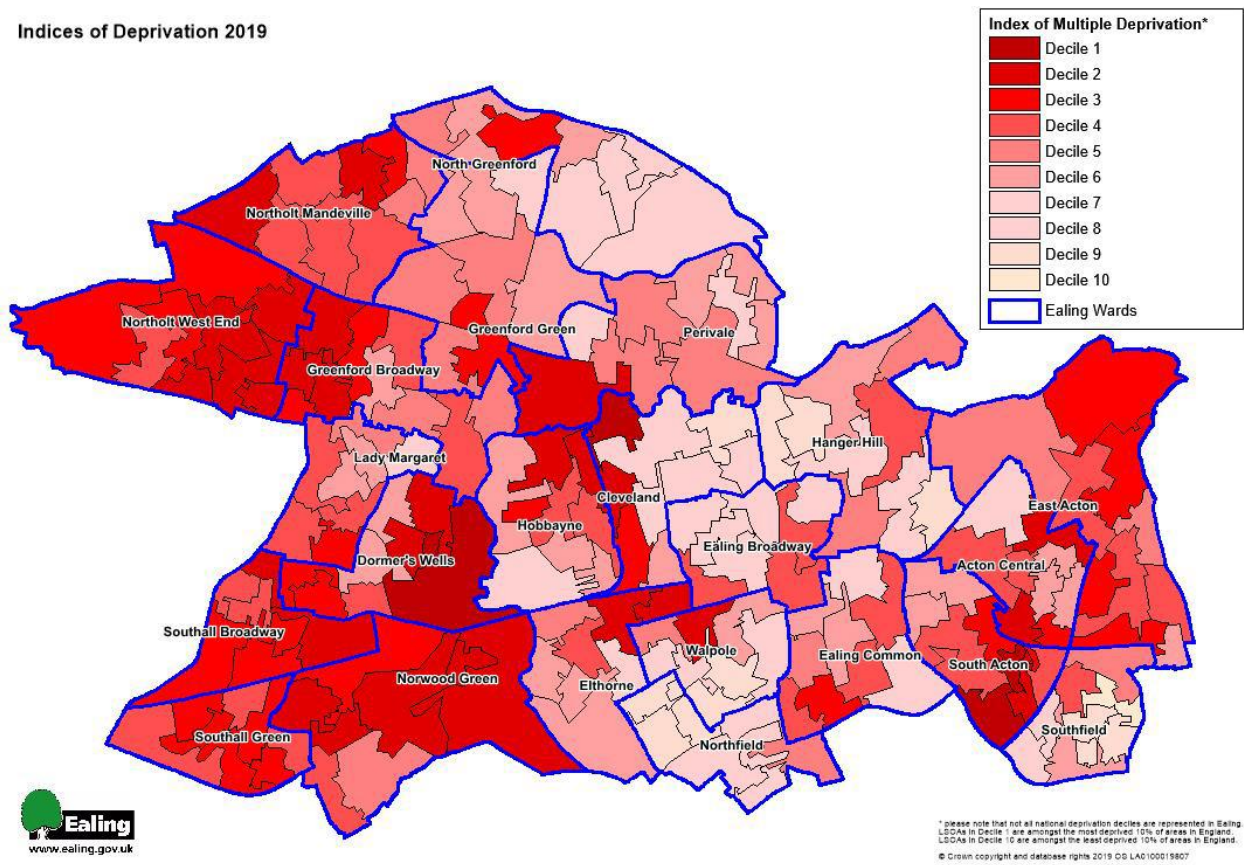

- Quantifying how deprived a small area is
- Identifying deprived people
- Saying how affluent a place is
- Comparing with small areas in other UK countries (i.e. other than England)
- Measuring real change in deprivation over time

Further information on usage of the Indices of Deprivation is available in chapter 3 of MHCLG's research report.<sup>1</sup>
